

Cisco 7900 Series IP Phones

The Cisco family of IP and wireless IP phones provides a complete range of communication devices designed to take full advantage of the power of your data network, while providing the convenience and ease-of-use you've come to expect from your business phone. From the home office to the manufacturing floor, from the lobby to the executive suite, there is a Cisco IP Phone for you.

Cisco IP Phones are designed to enhance productivity and address the specific needs of the variety of users in your organization. Cisco IP Phones 7970G, 7960G, 7940G, 7912G and 7905G feature pixel-based LCD displays, offering dynamic soft keys that guide a user through call features and functions, and can support additional information services including Extensible Markup Language (XML) capabilities. XML-based services can be customized to provide users with access to a diverse array of information such as stock quotes, employee extension numbers, or any Web-based content.

With the recent introductions of both the Cisco IP Phone 7970G, with its backlit, high-resolution color touch-screen display, and the Cisco Wireless IP Phone 7920, Cisco extends the power of IP Communications throughout the enterprise by delivering the latest technology and advancements in IP Telephony.

- All models offer straightforward user customization capabilities to meet changing needs
- Cisco IP Phones 7970G, 7960G, 7940G, 7910G, 7910G + SW, 7912G, 7905G and 7902G can accept Cisco pre-standard Power over Ethernet (PoE) from a card integrated with a Catalyst switch or a Catalyst in-line power patch panel
- Cisco IP Phones 7970G, 7960G, 7940G, 7910G + SW, and 7912G include two-port 10/100BaseT switch interfaces to ensure quality of service (QoS)
- Cisco Wireless IP Phone 7920 delivers up to six extensions, wireline voice quality, small form factor, standard and extended Li-ion battery options, menu driven graphical user interface, and inter-campus secure-seamless roaming
- Cisco IP Phone 7902G, is a cost-effective, single-line, entry-level IP phone addressing the voice communications needs of a lobby, laboratory, manufacturing floor, or hallway--or other areas where only basic calling capability is required

Cisco also protects your existing investments in analog devices and fax machines while taking full advantage of the benefits afforded by IP Telephony. Cisco offers a range of open standards-based, mixed environment analog telephone adaptors for up to two devices, and gateways for up to 48 devices, to interface analog fax machines and telephones with IP-based telephony networks.
